Fair Dinkum Fertilizers

- ✓ 100% Australian made
- ✓ Organic formulation
- ✓ No withholding periods
- ✓ Suitable for boom sprays and drippers
- ✓ Formulated with amino acids and peptides

Eco Stim

organic amino acids & peptides blend

get fair dinkum...grow naturally!

20 ltr 200 ltr 1000 ltr

Fair Dinkum Fertilizers Eco Stim is made from organic protein which has been broken down into peptides and amino acids. Eco Stim also contains a range of trace elements such as calcium, copper, zinc and iron.

The peptides and amino acids can be used by plants and soil microbes as a source of nitrogen and are the building blocks to make a range of other proteins including enzymes. Some of the amino acids such as proline can increase the resistance to abiotic stress such as heat, cold and drought stress, whilst other amino acids are effective as chelating agents.

Amino acids are readily absorbed by plants and do not require slow transformation into other substances before being taken up by the plant. In addition to nitrogen this product also contains appreciable amounts of potassium and a small amount of phosphorus.

Directions:

This product should be used at a rate of 5-8 L/ha.

This product should be diluted at least 1 part product with 20 parts with water and should only be applied when the temperature is less than 25 degrees C to avoid the possibility of leaf burn.

When used on pasture it is recommended that animals are not allowed to graze on the pasture for at least 10 days to allow time for the hydrolysate to enter the plant and commence working.

On pasture it can be applied multiple times during the growing season provided there is adequate moisture.

Allow at least three weeks between applications.

Eco Stim - 20 Ltr

Analysis	
Nitrogen	5.7 %
Phosphorus	1.2 %
Potassium	11.7 %
Proteins & Amino Acids	35 % min
Filtration	100 mic

%W/V is grams per 100ml of product
ppm is parts per million on weight basis
g/l is grams per litre
mic = microns
