

Mylo[®] for digestive health and development in your young livestock

Mylo is a probiotic, containing *Lactobacilli*, to aid in the digestive health of livestock.

Scientifically developed from Terragen's platform of beneficial microbes, Mylo has many benefits for farmers:

- ✓ Aids in building the population and activity of beneficial microbes in the gastrointestinal tract of livestock.
- ✓ Helps maintain a healthy immune system.
- ✓ Free of antibiotics and hormones.

Make Mylo part of your farm health program

- Advanced Biotech
- Quality Assured
- Australian Made

"The calves are healthier and stronger. They also seem more resilient to disease. If any of them contract scours, they recover quickly and it doesn't knock them about as much as it usually would."

Rob Neal, Dairy Farmer, VIC.
